

UniMac[®]

SAFE. COMPLIANT. READY.

The industry's leading firehouse laundry solution

"For safety, price and convenience, I think more and more fire departments are considering the benefits of having advanced equipment in-house."

— Fred Jandrucko, Captain, Fort Worth Fire Department

LAUNDRY TAILOR-MADE FOR FIREHOUSES

For firefighters, clean equipment isn't a preference—it's a necessity. And it's not just about getting it clean. How you clean it can mean the difference between being at risk and being protected.

With over 60 years of dedicated on-premises laundry experience, we at UniMac® understand the unique laundry needs of firefighters and their gear, and we design equipment specifically to meet those needs. Our machines are built tougher for longer-lasting performance. They deliver the best clean, removing all damaging materials from gear while maintaining its protective integrity. Our equipment meets all government requirements, is incredibly easy to use and features more innovations that help minimize your operating costs. And it's supported by the largest, most knowledgeable distributor network in the business, providing everything you need to be safe, compliant and ready when the alarm sounds.

SAFE.

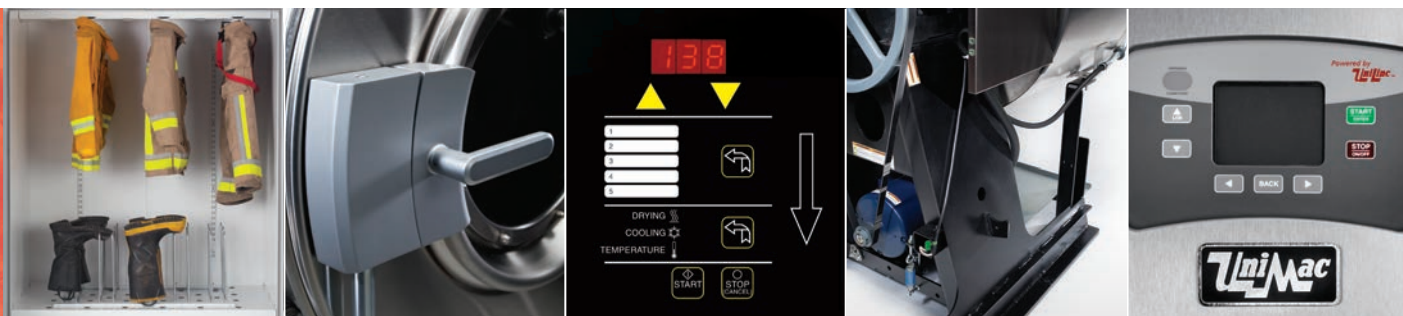

If your gear isn't cleaned properly, the particles and chemicals left behind can diminish the safety properties the gear was designed to offer. However, too rigorous of a wash can also jeopardize the integrity of the protective materials. UniMac's exclusive, advanced technologies allow our equipment to deliver superior wash results while, at the same time, taking gentle care of your gear to ensure that its protective qualities are uncompromised.

COMPLIANT.

We're more than just aware of NFPA 1851 guidelines and other codes and standards. Our experts understand them inside and out, and our equipment is designed for total compliance. Our knowledgeable distributors can connect you to the best resources for NFPA requirements regarding wash formulas, chemicals, wash methods and more.

READY.

UniMac equipment is built to get you back into action faster. With an easy-to-use, dependable in-house laundry solution, you can do your laundry on your schedule without wasting time sending gear out to be cleaned. And because UniMac machines are durably constructed with our heavy-duty, computer-optimized frame and protected by the industry's best warranty, you won't have to wait for time-consuming and costly repairs.

THE RIGHT SOLUTION STARTS WITH THE RIGHT EQUIPMENT

Your gear isn't like any other laundry, and it shouldn't be treated that way. UniMac offers a full line of durable washers and dryers with features designed specifically to meet your needs and provide the lowest cost of ownership in the industry.

UW WASHER-EXTRACTORS

When it comes to maximum performance at minimal operating costs, there simply is nothing better than the UniMac UW washer-extractor. Durable construction, industry-leading efficiency and exclusive innovations like UniLinc™ controls and OPTIspray™ Rinsing Technology combine to deliver lower costs and a better wash on your gear than any other laundry machine on the planet.

More Durable A plate-steel industrial frame and premium components are built to withstand the stress firefighting gear can put on machines, including excessively unbalanced loads.

Easier To Use Revolutionary UniLinc controls make operating your UW washer-extractor easier than ever with user-friendly graphic displays, 41 customizable cycle options, one-touch operation, performance monitoring and more.

More Efficient With advanced features like UniLinc, OPTIspray and auto leak and drain detection, UniMac washer-extractors deliver the absolute lowest cost of ownership in the industry, saving you thousands per year in energy and water costs.

PPE DRYING CABINET

The ideal drying solution for firehouses of all sizes, UniMac's PPE Drying Cabinet delivers all the features to help you dry your gear faster, safer and for less money.

Faster UniMac's PPE Drying Cabinet offers preset programs ranging from 1.5 hours to 3 hours to help you greatly reduce drying time versus conventional methods, getting your PPE back into service fast.

Easier To Use Operating the dryer is as simple as selecting one of the five presets and pressing the start button. Additional time can be added as required.

More Efficient Our dual-sided airflow process not only sends heated air around the gear, but also through the inside for maximum speed and efficiency. In addition, air is recirculated to further increase efficiency for lower utility costs.

REVOLUTIONARY UNILINC™ CONTROLS

UniLinc, laundry's most advanced control system, combines ultimate programming capability and cutting-edge innovation to deliver the ideal wash on your gear at the industry's lowest cost of ownership.

- OPTIspray Rinsing Technology uses less water to deliver a superior rinse.
- User-friendly controls make training and operation simple, while one-touch activation allows you to simply select a cycle and push start.
- Records highest water temperature reached and other key measures, giving you peace of mind that your firehouse is NFPA 1851 compliant.
- Industry-leading fast cycle times combined with drain and fill valves deliver lower electricity costs and increased throughput so you can process more each day.
- Temperature-controlled fill, soak capability and variable extract speeds protect the integrity of your gear, keeping you safer and saving you money on replacement costs.
- Programmable water levels let you select the ideal water usage according to load type and size.

MORE THAN MACHINES. TOTAL LAUNDRY SUPPORT.

When you choose UniMac®, you get more than the best wash at the lowest cost. You get the comprehensive support of our network of the industry's most dedicated, most knowledgeable distributors. They're standing by as your personal laundry experts — so you don't have to be.
